SETTING UP CYOTPOINT™ IN YOUR AVIMARK® SOFTWARE

1. Start by setting up inventory codes for each size vial by first clicking on **Rx** in your navigation bar

2.

EDIT A CURRENT ITEM
If the code is already set up, you can search for it by typing in the description field

SETTING UP A PRODUCT
Right click where the product descriptions are displayed and select **New**

3. Set up treatment codes for each weight range of CYTOPOINT, which you will find on the dosing chart

⬇

For each weight range, you will see corresponding doses and number of vials

4.

Ensure you associate the appropriate number of each vial size ---- This can be found under the inventory category ---- This will ensure the inventory is being deducted accurately
